ICB Level Dashboard Example

This example shows dashboards from uploaded search files from participating practices across an ICB.

Dashboards enable ICBs to compare and measure the impact of **One***Asthma* across their practices.

The data-driven insights help healthcare professionals to make informed and targeted interventions along with understanding the resource allocation required.

Benchmarking allows healthcare organisations to measure the quality of care they provide against national standards

Dashboard for **3** PCNs in **ICB Name Example** *(QE1)*

Out of the **3 PCNs** active in **One***Asthma*, **2** have practices who have **uploaded follow-up search results.** These are represented in the calculations in the paragraphs that go with each plot below.

Patients on Asthma Register

(excl. those with COPD, on Palliative Care Register or with Exercise Induced Asthma)

There are currently **78 patients (0.23%)**, compared to **74 patients (0.22%)** at baseline, that meet this criteria in the **2 PCNs** in **ICB Name Example** which have **uploaded follow-up search results.**

Plotted data can be toggled on/off by clicking on the relevant colour, or text, in the legend situated underneath each chart. Each bar can also be hovered over to see information specific to that PCN.

Legend: Baseline Prevalence | Latest Prevalence

Indicators of Poor Control

| Hospital Admission or >2 exacerbations⁺ | ≥2 Systemic Oral Corticosteroid (OCS)⁺ | Poor symptom control or Asthma Control Test (ACT) <20⁺ |

Click here to read the "Search Rationale" *for a full list of drugs*

⁺ In the last 12 months

There are currently **1,681 patients** with indicators of poor control, compared to **1,664 patients** at baseline, in the **2 PCNs** in **ICB Name Example** which have **uploaded follow-up search results**.

Patient numbers between **1 and 7 are suppressed**, aligned to NHS England's approach to suppression of small patient counts, so the collated numbers in the paragraph text above may not match the total count in the bar plots.

Plotted data can be toggled on/off by clicking on the relevant colour, or text, in the legend situated underneath each chart. Each bar can also be hovered over to see information specific to that PCN.

Legend:
- Baseline: Hosp. Adm. or >2 exacerb.
- Latest: Hosp. Adm. or >2 exacerb.
- Baseline: >=2 OCS
- Latest: >=2 OCS
- Baseline: Poor sympt. contr. or ACT <20
- Latest: Poor sympt. contr. or ACT <20

Patients Issued short-acting β-agonist (SABA) monotherapy

(no Inhaled Corticosteroids (ICS)) in 12 months*

| Hospital Admission or >2 exacerbations⁺ | ≥2 Systemic Oral Corticosteroid (OCS)⁺ | Poor symptom control or Asthma Control Test (ACT) <20⁺ |

Click here to read the "Search Rationale" *for a full list of drugs*

⁺ In the last 12 months

There are currently **379 patients** with indicators of poor control, compared to **373 patients** at baseline, in the **2 PCNs** in **ICB Name Example** which have **uploaded follow-up search results**.

Patient numbers between **1 and 7 are suppressed**, aligned to NHS England's approach to suppression of small patient counts, so the collated numbers in the paragraph text above may not match the total count in the bar plots.

Plotted data can be toggled on/off by clicking on the relevant colour, or text, in the legend situated underneath each chart. Each bar can also be hovered over to see information specific to that PCN.

Legend:
- Baseline: Hosp. Adm. or >2 exacerb.
- Latest: Hosp. Adm. or >2 exacerb.
- Baseline: >=2 OCS
- Latest: >=2 OCS
- Baseline: Poor sympt. contr. or ACT <20
- Latest: Poor sympt. contr. or ACT <20

Patients Issued ≤ 2 SABA monotherapy + ICS in 12 months*

| Hospital Admission or >2 exacerbations⁺ | ≥2 Systemic Oral Corticosteroid (OCS)⁺ | Poor symptom control or Asthma Control Test (ACT) <20⁺ |
